Developer: [Tomislav Tomašković]

Hours Worked

- Start Time: 12:30
- End Time: 17:00
- Total Hours: 4:30

Tasks Completed

Task 1: [Setup wiki on Railway]

- **Ticket/Issue #:** [Reference number]
- **Description:** This setup improved development efficiency
- **Implementation Details:**

  - Setting GitHub token on Railway:
    -Creating new classic token on GitHub.

  Classic token (Railway)
  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

  -Creating new project on railway.
  -Adding new variable GITHUB_TOKEN where we copyed our newly created classic token.
  - GitHub CLI
    -copying repository Logicna-Podloga/Wiki-docker (gh repo clone Logicna-Podloga/Wiki-docker).
    -Go into project Wiki-docker with command cd and open with command zed . to open in zed.
  - Wiki Railway
    -Creating files Dockerfile, railway.toml, apps.json, sire-config.json, common_site_config.json, docker-entrypoint.sh.
    -changing few files from so it works with MySQL database
    -adding remote repository (git remote add origin https://github.com/username/repository.git)
    -adding files (git add .), commiting (git commit) and pushing to repository (git push -u origin development)
    -Added shared variables admin and mySQL(${{ mysql.RAILWAY_MYSQL_URL }})
    -setting them on railway, adding redis and mySQL database
    -deploy
      - Challenges
        -Had to search commands
        -Had to install few things
        -Build failed
        -Correcting Sonet for right guide and files
      - Code changes made
        -files in project
- **Files Modified:**
  - `path/to/file1.ext`
  - `path/to/file2.ext`
- **Status:** In Progress

Task 2: [Task Name]

- **Ticket/Issue #:** [Reference number]
- **Description:** Brief description of what was accomplished
- **Implementation Details:**
  - Technical details about the implementation
  - Challenges encountered and solutions applied
  - Code changes made
- **Files Modified:**
  - `path/to/file1.ext`
  - `path/to/file2.ext`
- **Status:** Completed / In Progress / Blocked

Code Review

- **PRs Submitted:**
  - PR #[number] - [Brief description]

Meetings Attended

- [Meeting name] ([13:30-15:30]) - [Subject - Company search (how, where, which), assigning and scheduling meetings]

Blockers/Issues

- [Description of blocker] - [Action taken or needed]

Tomorrow's Plan

- [Study Docker]
- [Wiki on Railway project]
- [Task 3]

Notes

- Important insights or learnings
- Documentation needs identified
- Technical debt observations
- Ideas for future improvements

Resources Used

- [Sonet,
  https://github.com/frappe/frappe_docker/blob/main/docs/custom-apps.md,
  https://docs.railway.com/guides/variables#shared-variables]
